TITANIUM™ 3

AgriLabs

Bovine Rhinotracheitis-Virus Diarrhea Vaccine, Modified Live Virus (IBR-BVD)

U.S. Vet. Lic. No.: 213

Contents: This product contains the antigens listed above.

Contains neomycin as a preservative

Indications: For the vaccination of healthy cattle as an aid in the prevention of disease caused by bovine rhinotracheitis virus and bovine virus diarrhea virus, Type I and Type II.

Dosage and Administration: Rehydrate the desiccated vial with accompanying diluent and shake well. Inject 2 mL intramuscularly or subcutaneously using aseptic techniques. Annual revaccination is recommended. Calves vaccinated before weaning should be revaccinated 30 days after weaning when the possible influence of maternal antibodies is decreased.

Contraindication(s): Do not use in pregnant animals or in calves nursing pregnant animals. Abortions may result.

Precaution(s): Store at 35° to 45°F (2° to 7°C). Do not freeze. Use entire contents when first rehydrated. Burn container and all unused contents.

Caution(s): Allergic reactions may follow the use of vaccine.

Antidote(s): Epinephrine.

Warning(s): Do not vaccinate within 21 days before slaughter.

For use in animals only.

Manufactured by: Diamond Animal Health, Inc.

Presentation: 10 dose (20 mL) and 50 dose (100 mL) vials.

NAC No.: 10581050
